Survey point

15.03.2020

—

Chandru V

Overview

This project is based on a web application which collects data from the users for survey in different professional fields. In this Application users would offer to complete short surveys while standing in line, or waiting for a subway. Topics include everything from survey polls, to review and feedback.

Goals

1. To review companies, hotels , places or any products.
2. Easy and short surveys with a user friendly environment.
